urn:WANIPConnection-com:serviceId:WANIPConnection1

This service supports only IP based WAN connections. E.g. the FRITZ!Box cable products typically use such a connection type. If your WAN interface uses a PPP connection, please have a look at the WANPPPConnection1 service description. To make sure which kind of connection type is used, you can make a TR-064 request to Layer3Forwarding:GetDefaultConnectionService which provides this information.

For details please refer the TR-064 document at https://www.broadband-forum.org/technical/download/TR-064.pdf.
